Project description:

This project involves designing an interactive dashboard to visualize and analyze key metrics of UK universities. The dashboard provides insights into tuition fees, international student percentages, student satisfaction, IELTS requirements, and regional distributions. It helps prospective students, educational consultants, and policymakers make data-driven decisions based on institutional rankings, costs, and student experience.

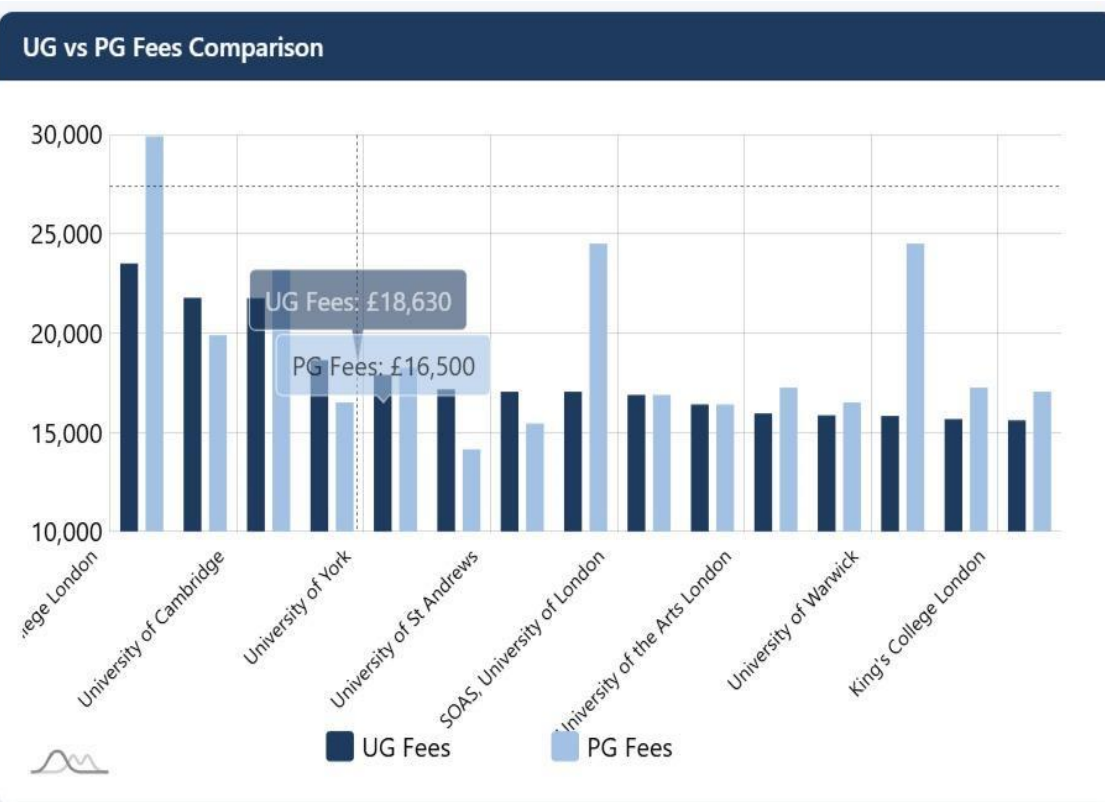

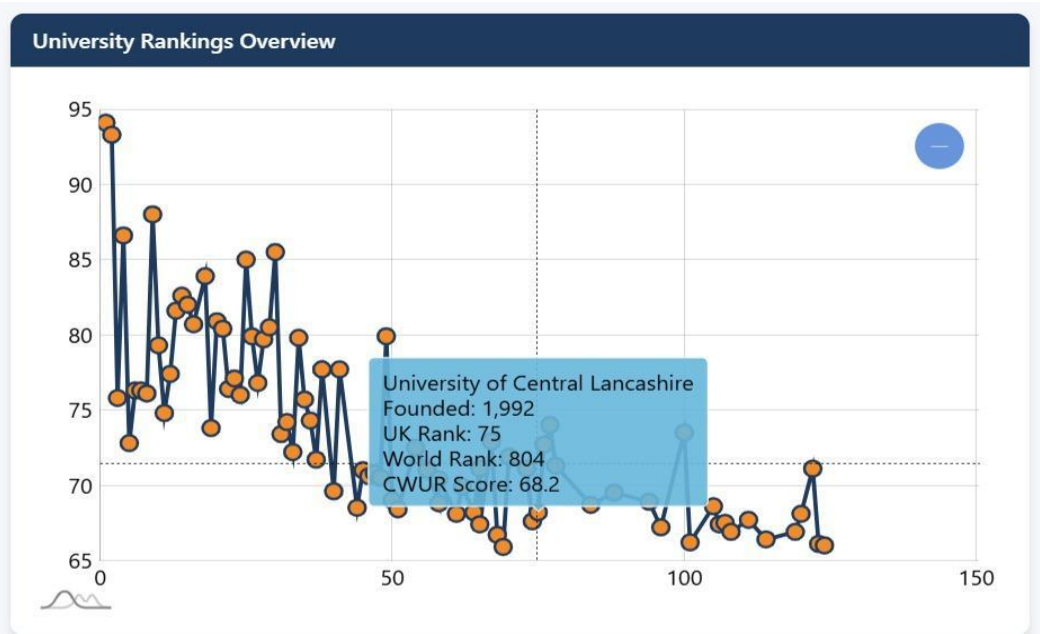

Chart 1:UG vs PG Fees Comparison :A bar or line chart comparing undergraduate and postgraduate fees.

Why line or bar chart:Easy to compare two related metrics side-by-side for each university.

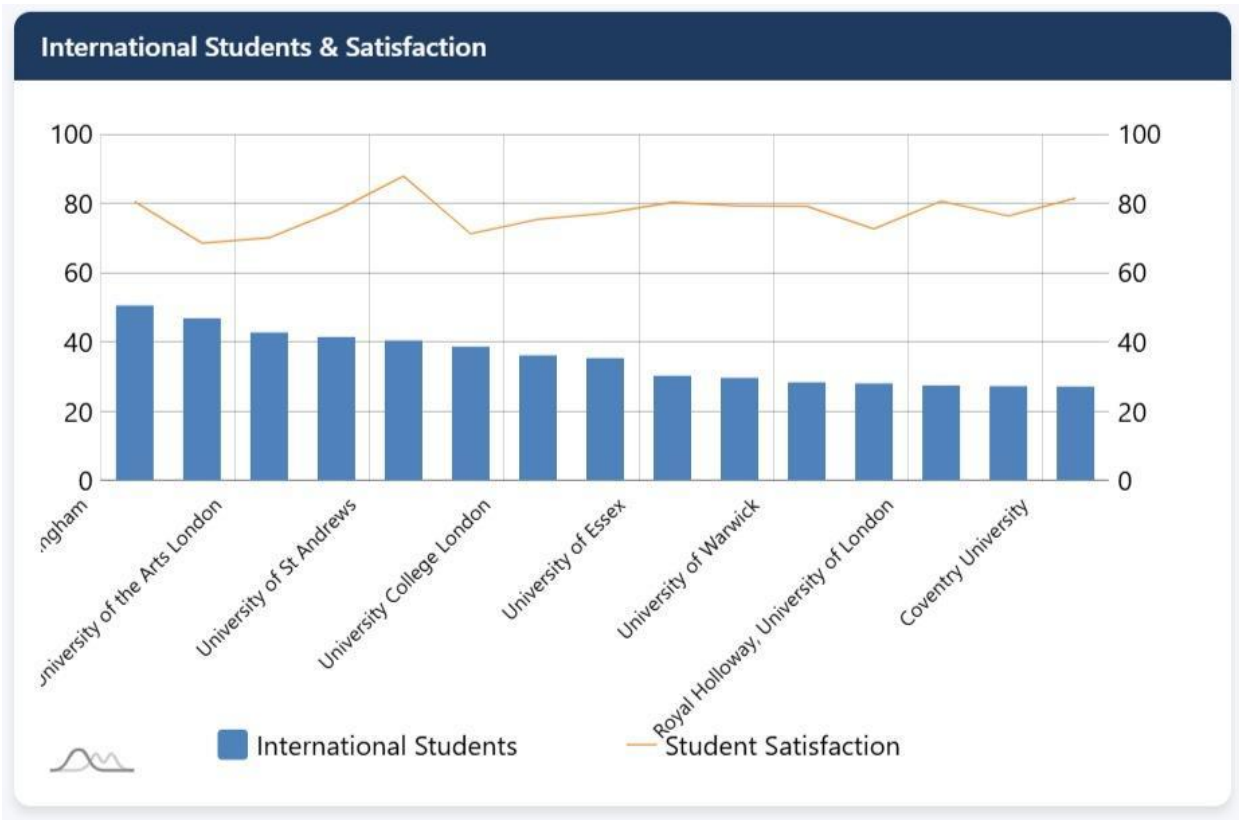

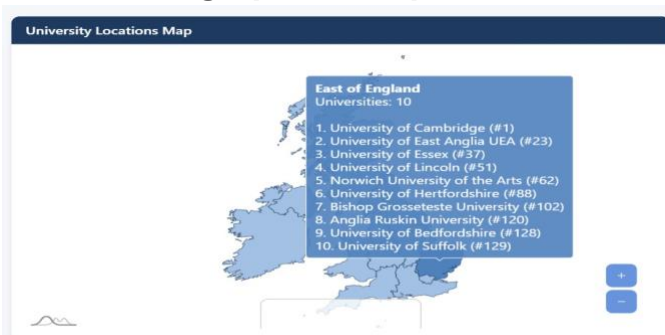

Chart 2:International Students & Satisfaction BAR Chart :Visualizing the relationship between international student percentage and satisfaction rates.comparing international student percentage and student satisfaction for selected universities.

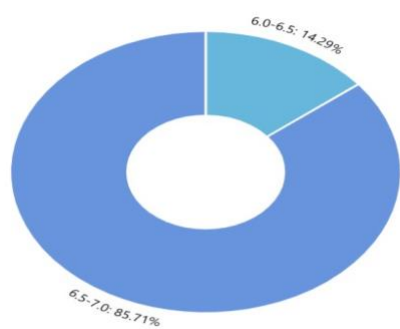

Why Bar :Enables direct comparison of international enrollment and satisfaction for selected universities in one view.

Chart 3 Geographical Map:

University Locations Map : A geographical map showing university distribution across UK regions.
Why GEO map:Provides spatial context, helps users locate universities by region.

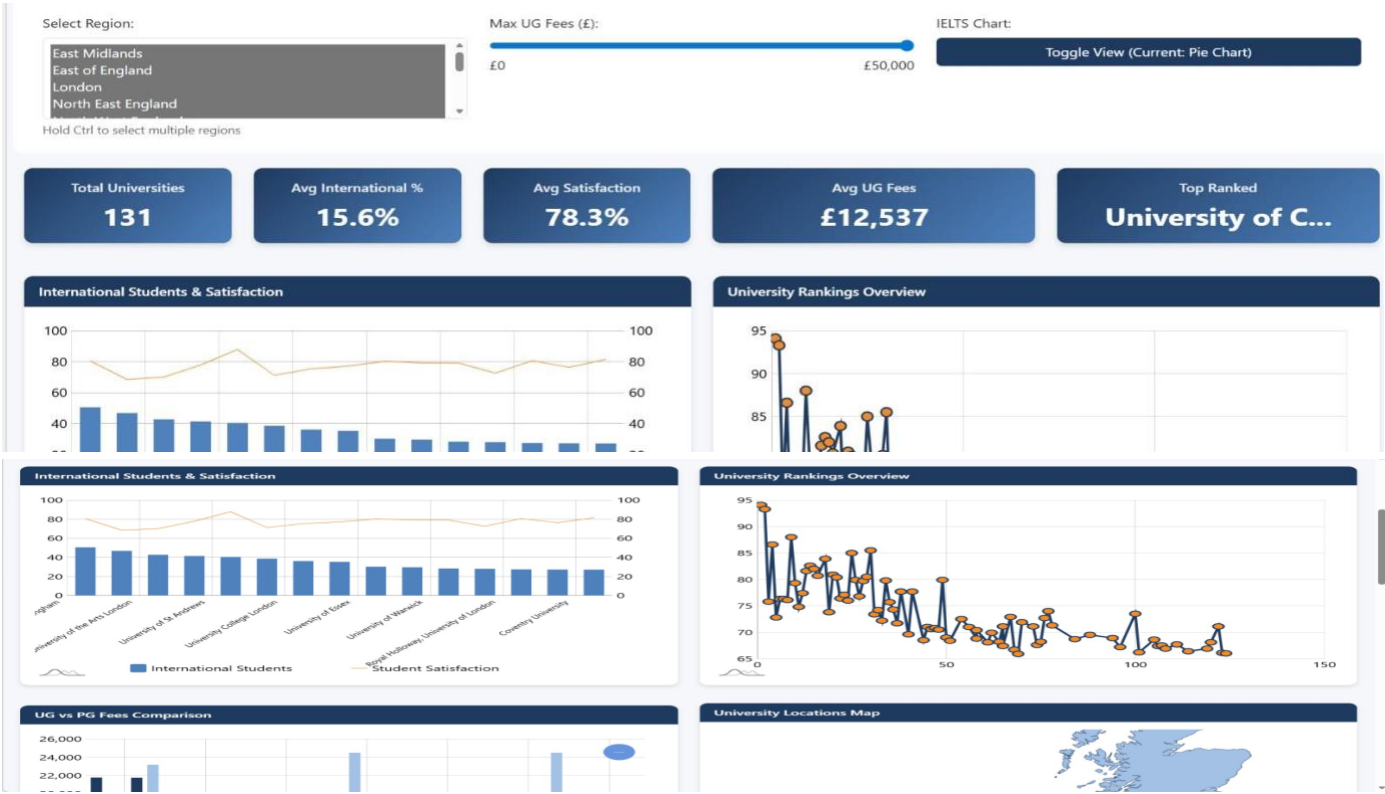

Chart 4:

Gauge Chart (IELTS):A gauge or meter chart showing the range of IELTS score requirements across universities, with a highlighted average or target value.

Why gauge chart:Quickly shows where most universities fall in terms of IELTS requirements; intuitive for thresholds.

FULL DASHBOARD

The dashboard includes the following visualizations:

- IELTS Scores Distribution Gauge Chart** :A gauge or meter chart showing the range of IELTS score requirements across universities, with a highlighted average or target value.
- University Details Table** : A detailed view of top universities with key metrics.
- UG vs PG Fees Comparison** – A bar or line chart comparing undergraduate and postgraduate fees.
- International Students & Satisfaction Bar Charts** :Two side-by-side bar charts comparing international student percentage and student satisfaction for selected universities.
- University Locations Map** :A geographical map showing university distribution across UK regions.
- University Statistics Table** :Enrollment, staff, and living cost summaries.

Questions Planned to Answer in the Dashboard

1. What is the typical range of IELTS scores required by UK universities?
2. How do undergraduate (UG) and postgraduate (PG) fees compare across top-ranked universities?
3. Which universities have the highest percentage of international students?
4. Which universities have the highest student satisfaction rates?
5. How do international student percentages and satisfaction rates compare for specific universities?
6. Which regions in the UK have the highest concentration of top-ranked universities?
7. What are the estimated living costs for students in different universities?
8. Which universities offer the best value considering fees, satisfaction, and international exposure?

Why This Dashboard Design Was Selected

- **User-Centric Layout:** Information is grouped logically—fees, admissions, satisfaction, and location—so users can find related metrics together.
- **Interactivity:** Filters (e.g., by region, rank, IELTS score) allow dynamic exploration.
- **Visual Hierarchy:** Important KPIs (top rankings, high satisfaction) are highlighted.
- **Responsive Design:** Works on different screen sizes for accessibility.
- **Color Coding:** Consistent color schemes (e.g., blue for International, green for Satisfaction) improve readability.
- **Gauge Chart for IELTS:** Effectively communicates score ranges and thresholds at a glance, ideal for admission criteria.

Which Questions Each Chart Is Linked To:

Chart	Linked Questions
IELTS Scores Distribution Gauge	Q1, Q8
University Details Table	Q2, Q7, Q8
UG vs PG Fees Comparison	Q2, Q8
International Students & Satisfaction Bar Charts	Q3, Q4, Q5, Q8
University Locations Map	Q6, Q7
University Statistics Table	Q7, Q8
